1. ITA- Come prima operazione è importante pulire il muro su cui si andrà a lavorare.
ENG- As a first operation it is important to clean the wall on which you will be working.
2. ITA- Successivamente posizionare i pilastrini:
 - quelli da 5 cm in corrispondenza di angoli, porte o nella parte terminale della boiserie.
 - quelli da 10 cm lungo tutta la parete interessata a intervalli pari alla larghezza del pannello.

ENG- Then position the pillars: - the 5 cm ones at the corners, doors or at the end of the boiserie.

- those of 10 cm along the entire wall concerned at intervals equal to the width of the panel.

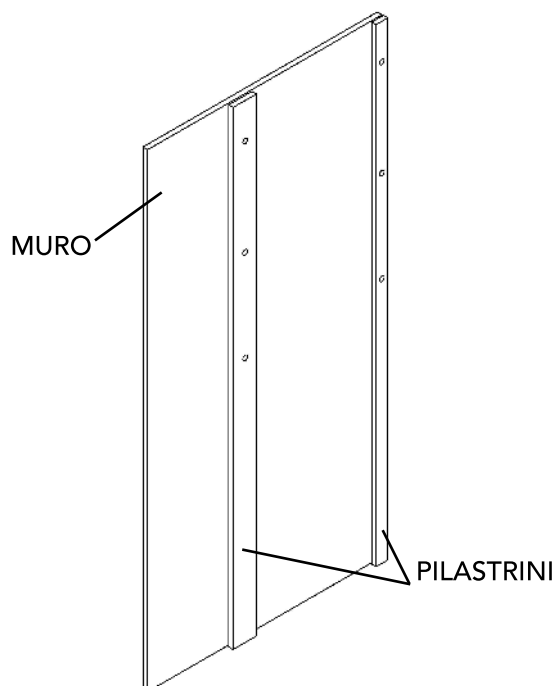

NB. è importante che la metà dei pilastrini da 10 cm corrisponda alla parte finale del pannello.

Note Well . it is important that half of the 10 cm pillars correspond to the final part of the panel.

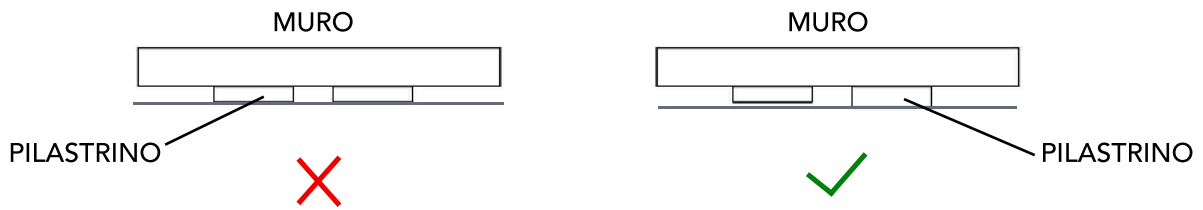

ITA- Per fissare saldamente i pilastrini è sufficiente usare dei tasselli/fischer

ENG- To securely fix the pillars simply use dowels/fischers

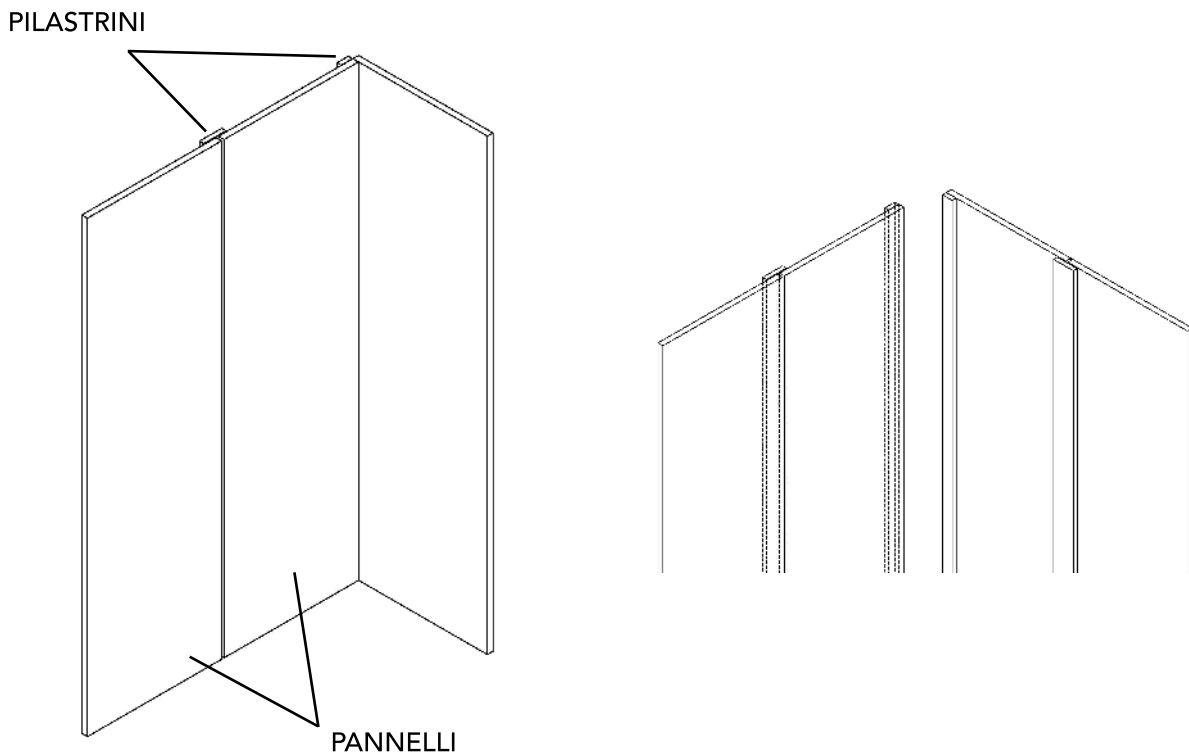

NB. è importante che i pilastrini siano sullo stesso piano, affinché anche i pannelli siano sullo stesso livello.

Note Well. it is important that the pillars are on the same plane, so that the panels are also on the same level.

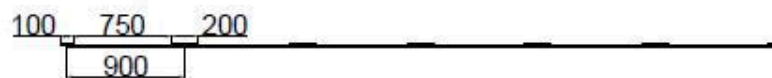

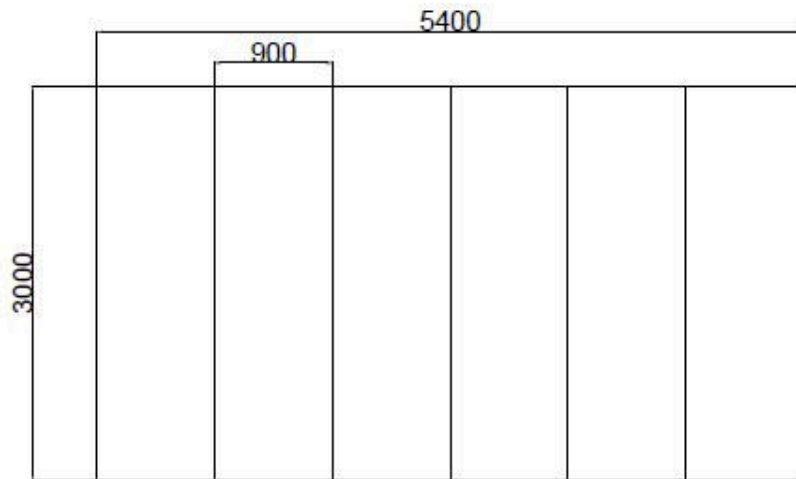

3. ITA- Successivamente fissare con, il velcro, i pannelli della boiserie ai pilastrini
ENG- Then fix the boiserie panels to the pillars with Velcro
